

Advanced Practice Clinician-Interventional Radiology

Location: Winston Salem, NC

Position: Full-Time, Monday-Friday 8-5

Rotate night and weekend once trained

Triad Radiology Associates is searching for an Advanced Practice Clinician (PA or NP) to join our team. The ideal candidate is driven, eager to learn new skills, and willing to evolve with the needs of the practice. He or she should have strong communication skills and a positive attitude, one that creates a positive environment for the patients and team members. Overall dedication to the success of the team and TRA as an organization is imperative.

Triad Radiologist Associates is a physician-owned practice serving Winston Salem and the surrounding area for over 50 years. The practice includes 53 subspecialized radiologists and 8 APCs who work together to provide imaging interpretations and procedural services for 7 acute facilities, 8 imaging centers, and TRA's Interventional Clinic.

Description: The Interventional Radiology APC serves as a critical member of the Interventional Radiology team. The IR APC is responsible for performing consults, physical examinations, and radiologic procedures under the supervision of the radiologist. The ideal candidate should be comfortable working independently. Once fully trained, he/she will become part of the night and weekend call rotation.

Radiologic procedures include but are not limited to the following:

- Lumbar Puncture
- Paracentesis
- Thoracentesis
- US Guided Biopsies
- Port a Cath Insertion/Removal
- Hemodialysis Access
- Central Line Access

Minimum Qualifications:

Graduate of an AMA-approved Physician Assistant program

2 years of clinical experience

Experience in Interventional Radiology or surgical services is preferred
